

## **Reporting Capabilities**

RightCHOICE's *Report Factory Standard Reports, Enhanced Reports* and *Benefit Analyzer* are included in our administrative services. *Report Factory* exceeds HIPAA security mandates.

Consultants and brokers, as well as their clients, can subscribe to the *Report Factory Standard Reports* that they need and receive the reports over the Internet. *Standard Reports* are listed in the chart beginning below.

*Enhanced Reports* offered are:

- Medical Claim Cost Summary — MTD
- Medical Claim Cost Summary — YTD
- Top 30 Providers — Outpatient
- Top 30 Providers — Hospital Inpatient
- Top 30 Providers — All Other Inpatient
- Claim Turnaround
- Large Claims by Dollar
- Large Claims by Diagnosis
- Paid Medical Claims by Type of Service
- Medical Payments by Dollar Range
- Paid Claims (All Coverages)
- Network Utilization Statistics Savings/Analysis

*Benefit Analyzer* is an online, ad-hoc reporting tool that accesses more than 1,500 variables. *Benefit Analyzer's* comparative benchmarking allows clients to:

- Analyze the effects of employee benefit behavior.
- Compare utilization and cost to normative data or prior periods. (Benchmark databases are a compilation of data from the Health Care Financing Administration, The Kaiser Family Research Foundation, and others.)
- Make cost effective benefit plan changes.

By providing clients with an on-demand premium level of technology, pertinent data related to plan experience is always at the touch of a finger.

The reporting category and analytical capabilities available within *Benefit Analyzer* are:

- Claims Analysis Overview
- Shock Claim Summary
- Prescription Drug Summary
- Dental Summary
- Cost Distribution Summary
- Cost by Age Group
- Key Utilization Indicators

- Service Use Summary
- Medical Cost Distribution (Category)
- Medical Cost Distribution (Diagnosis)
- Preventable Conditions
- Payee Analysis
- Diagnosis analysis
- Procedure Analysis
- Benefit Cost Summary By Employee
- Prescription Analysis
- Normative Comparison Summary
